"This is the second graduate program that I have chosen to study because I felt a lack of deeper knowledge and understanding of EU development during my involvement in political and social life in Latvia. This program gives a wonderful opportunity to those who plan their future career in politics or within European institutions to gain the necessary knowledge in just one year. Study courses include both theory and practice, thus allowing students to enhance their understanding of the processes, goals and aims of EU."

Olga Gogina, *student from Latvia*

"The Master in European Integration at the University of Belgrade has two main advantages. During the first semester, students have the possibility to gain a general knowledge of EU policies and laws, while in the second they are free to explore more specific areas thanks to a rich offer of optional courses. This was particularly helpul for someone, as myself, coming from a background different than legal. At second, all MEI courses are based on a dialectical approach meaning that debates and discussions during classes represent a central moment within the student learning process. These elements, combined with high academic standards and a helpul attitude toward students, make the Master in European Integration a unique learning opportunity."

Cristian Riva*, student from Italy*

"The competence of the professors, the diversity of taught courses, as well as the level of academic coaching at this master's program provides an excellent opportunity for all students to increase their knowledge in European political and legal issues, which is becoming increasingly important in today's world. This program fully met my expectations and it was a pleasure attending it."

Arifandy Refrawan*, student from Indonesia*

"The MEI program at the University of Belgrade has been a great opportunity for me to meet students from around the world and learn about the process of joining the European Union. Here in Belgrade I have found a very accommodating faculty, a wonderful city, and very open and inviting students. I would encourage many other students to enroll in the MEI program in order to understand this new and interesting field of study."

Kevin Bassney*, student from USA*

"The LL.M. study program in European Integration is a great opportunity for laywers to deepen their knowledge in European law. The combination with economic, political, international and normative elements provided a solid and broad interdisciplinary comprehension of European law. I was studying in a historical meaningful atmosphere in the center of Belgrade, which facilitated inter alia the understanding of (geo-)political relations. The engaged professors contributed to my academic development by stimulating discussions and encouraging us as students. I can therefore recommend the study program at the law faculty in Belgrade to every foreign student interested in European and/or International Law."

Paul Meder*, student from Germany*
