## SAVE THE DATE

Conference on the

### ***Current and Future Challenges of Coordinated Policies on AI Regulation***

Co-organized by the Hungarian Presidency of the Committee of Ministers of the Council of Europe  
and the Council of Europe

**26 October 2021, in virtual format**

The Hungarian Presidency of the Committee of Ministers is committed to inspire **important discussions on the safe exploitation of the full potential of artificial intelligence (AI)**. In line with the priorities of its Presidency, the Government of Hungary, in collaboration with the Council of Europe, is organizing a high-level multi-stakeholder conference on **26 October 2021**, in virtual format, focusing on the theme of ***Current and Future Challenges of Coordinated Policies on AI Regulation***.

With the intention to contribute to the improvement of AI policymaking at global, regional and national levels, we will strive to showcase various governance models and demonstrate the interplay between national policies and the relevant work of the Council of Europe and other key international organizations active in this field.

The event will provide an opportunity to engage in a multi-stakeholder and inclusive dialogue and science-based argumentation around the current initiatives in the field of AI regulation, and will demonstrate the relevance and usefulness of these initiatives for national public policies. Speakers will be drawn from various sectors, ranging from international organizations through national policy experts to tech companies, civil society actors and representatives of the academia.

A detailed programme of the virtual event with the registration information will be sent in due course.

We look forward to your participation!
